Subject: Microsoft Settlement

As a computer professional and a Microsoft shareholder, I strongly object to the proposed settlement between the US DoJ and Microsoft Corporation.

I believe that the methods and tactics used by Microsoft have not only been illegal and anti-competitive, I believe that they have hurt the entire computer industry and anyone who works in it. I personally estimate that innovation in the computer field has been set back at least five (5) years by their actions, as well as robbing customers of billions of dollars over a several year period.
